cuattro Micro|B

## Border Security DR System

Introducing the intuitive ultra-portable tactical digital radiography system designed by Cuattro **with** Bomb Techs, **for** Bomb Techs.

NEW

Cuattro Micro|B™ Product Features:

Cuattro Micro|B systems are built for suspicious package screening, bomb detection, explosive device mitigation, and tactical applications. The Micro|B is immediately deployable by agents for point and click simplicity, featuring a dual panel configuration.
Exclusive combination of capabilities include:

Proprietary Automatic Exposure Detection with True OnePulse
- Fast and Superior Sensitivity
  (lower dose, lower noise, higher signal)
- Nearly Zero EMI emissions for safe field operations

Exposure Anytime Technology
- Offline image capture and onboard storage
- Power on detector and expose
  (with or without acquire device-software)
- Auto-push images to tablet when available

Long Range Wireless Control and Data
- Long Range wireless technologies
- Control Generator and Detector simultaneously
- Fast Image transfer and display

Best Image Quality
- 16-Bit Dynamic range
- High-sensitivity mode to view dense objects
- Target-specific multi-frequency image tuning algorithms

Scan code with smart phone for demo video

cuattro Micro|B

4" x 6" Detector Specs:
- Pixel Pitch . . . . 100 micron
- Image Size . . . . 4" x 6" (22.9cm x 10.7cm)
- Weight . . . . 0.8 kg
- AED (Auto Exposure Control) . . . . 2-pulse AED
- Dead Space Margin . . . . <2.0mm on two sides
  (Bezel thickness)

10" x 12" Detector Specs:
- Pixel Pitch . . . . 99 micron
- Image Size . . . . 10" x 12" (35.3cm x 43.0cm)
- Offline Image Storage . . . . 200 Images
- Weight . . . . 1.7kg with batteries
- Water/Dust Intrusion Rating . . . . IP 67
- Batteries (2) . . . . 8h internal Lithium 3100 mAh
- AED (Auto Exposure Control) . . . . Zero EMI Optical trigger
- Dead Space Margin . . . . 2.7mm on two sides
  (Bezel thickness)
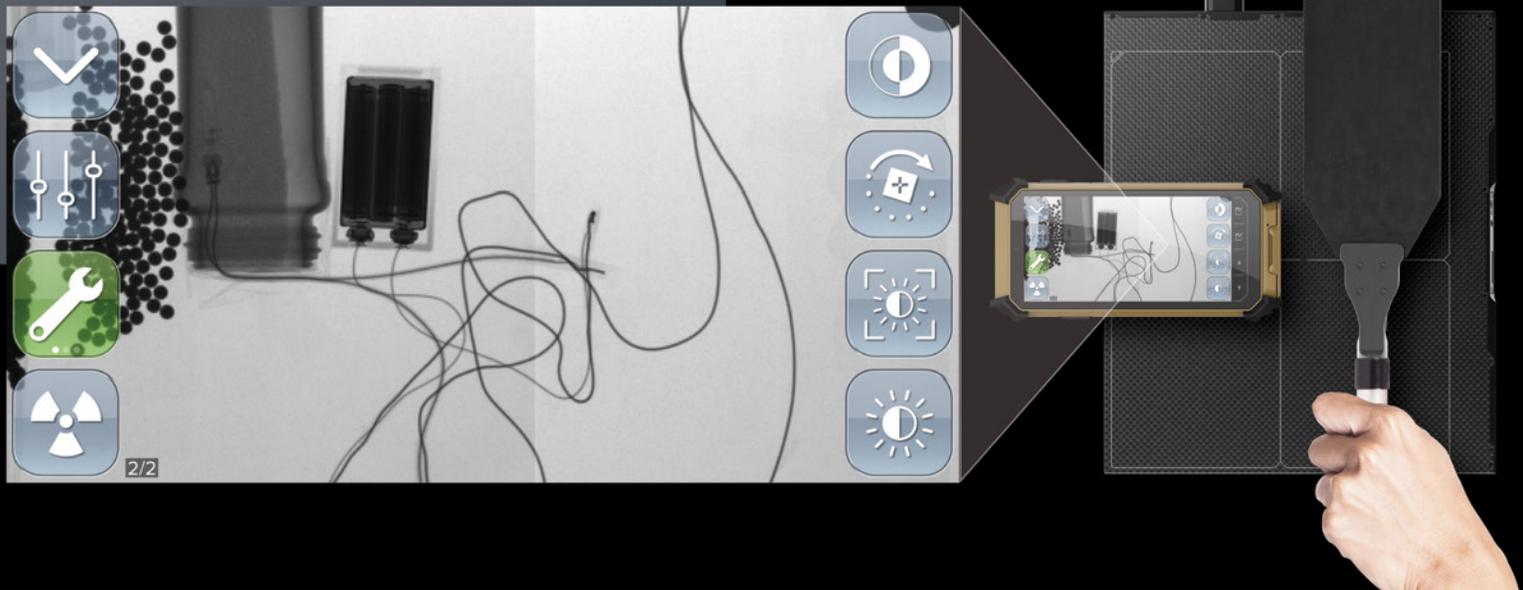

Cuattro Micro|B™ Software Features:

- Intuitive Interface with Thumb Operated Controls
- Handheld Form Factor
- Complete Source Integration (5pin and 7pin versions) with Automated Adjustments
- Quick Set and Shoot Workflow
- Chest Mount Compatible
- Complete set of Image Tools with Advanced Multi-Frequency Processing Tools
- Multi- Detector Capable
- Full XTK Integration

A Smarter direction in Digital Radiography… Better. Much better.
